

BUHRS *BB300 Solo*

Buhrs quality at an attractive price

Are you planning on expanding your services in the mailing industry? Are you specialised in offering services to a wide range of customers who require standardised mailings? If the answer to any of those questions is "Yes!", then the BB300 Solo is exactly what you need. This envelope inserting system was especially designed for same sized mailings in all popular DIN formats and even for special formats. Quick and simple adjustments make low volume machine-processed mail economically viable. High volume mail is processed swiftly and without hitches, allowing your production personnel to get the next run prepared instead of having to constantly monitor the production process.

To ensure that the system you get is tailored to your needs, we offer an array of feeders and high capacity autoloading options. And what's more, the BB300 Solo is very user-friendly. The excellent price-performance ratio and the exceptional Buhrs premium service makes this system so very attractive for any service company with a clearly defined portfolio of customers which demand mailings with standardized contents.

The BB300 Solo is a high-performance system at a fair price – both factors geared in equal proportions towards increasing the systems competitiveness and the customer's satisfaction.

Folding Feeder

Rotary Feeder

Shuttle Feeder

The right decision - for sure

One thing the BB300 Solo has going for itself is the robust, tried and approved design. The system can easily be upgraded with various automated manual process steps and additional insert feeders. If you have discovered a market niche that's just right for you or have an especially attractive one-off project coming your way – the BB300 Solo with its quick and simple adjustment routines will allow you to efficiently deal with all jobs. As an option, the BB300 Solo comes with a two year warranty or a guaranteed 20 million insertions. With the additional warranty period, a Buhrs technician will visit twice a year to carry out a preventative maintenance routine.

If you decide later that you need a more flexible system which can support the production of invoices or can selectively feed inserts? If you decide on the need to upgrade to a complete modular Buhrs envelope inserting system within the first two years of operation, we will accept your well serviced and maintained BB300 Solo as trade-in at very favourable conditions. Together with the long warranty periods, this option makes sure that you are always protecting your investment. Buhrs is a reliable partner interested in advancing your business development with words and deeds.

What the BB300 Solo can do for you

The BB300 Solo has a robust mechanical design and built-in user-friendliness. Our skilled employees need only a single day to get the system up and running at your facility. The "open architecture" of the equipment will help you to use the equipment efficiently in no time at all. And your in-house technicians will quickly come to terms on how to service the system. And what's more: The total cost of ownership (TCO) of the BB300 Solo is very low!

Feeders

The feeders listed below can be added to the BB300 Solo in any order:

- Folding feeder
- Vacuum/Friction feeder
- Rotary feeder
- Shuttle feeder

And if needed, these feeders can be moved and used with any other envelope inserting system of the Buhrs BB300 Series.

The BB300 Solo at a glance

The BB300 Solo stands out with its robust design, user-friendliness and fair price. The system will have you prepared to meet the demands of each and every standard application, thus giving you ease of mind when accepting an order from your customer. Other advantages are:

- High net output: The intelligent handling of missed or double sheets optimises the effective output – increasing the productivity per employee.
- Intelligent Control System for fault minimisation
- Large format variety with numerous possible applications
- Extensive warranty

Double savings with the additional warranty period for the BB300 Solo

The standard warranty period is one year or 10 million insertions, but the BB300 Solo can be purchased with an extended warranty period of two years or 20 million insertions. Within the additional warranty period, Buhrs will send expert technicians twice a year for an inspection and preventative maintenance routine. In addition, Buhrs will deliver and install spare parts (not included are wear parts and respective maintenance).

Your advantages

- For a period of two years, you can rely on low calculable costs.
- Your equipment will be regularly serviced, which prevents downtimes and ensures long-term protection of your investment.
- A Buhrs technician will regularly visit your production facility and will take the time needed to answer any questions your employees have concerning operation and maintenance of the equipment.

Do not hesitate to contact us if you need further information or if you would like to take us up on this offer.

Buhrs is the leading worldwide provider of mailing and fulfilment solutions. The company develops, manufactures, sells and services systems for film and paper wrapping, envelope inserting and fulfilment.

Buhrs systems prepare media products, such as magazines, newspapers, documents, direct mail products, books, videos, compact discs and cards, for distribution.

Buhrs is partner to postal organisations, publishers, printers, binders, mailing houses, letter shops, banks, service bureaus, insurance companies, fulfilment companies and many other companies ranging from medium-sized to leading businesses.

With over 4,500 systems installed worldwide and four new installations per week, Buhrs is well-established and proud of its reputation for quality and reliability.

Headquartered in Rotterdam, Buhrs has a network of subsidiaries in the Netherlands, Germany, France, the United Kingdom, Finland, the United States of America, Japan and China as well as industry-qualified distributors to provide global coverage.
